## Piping at a Waste Incineration Plant

### Project Details

Project Heat Recovery  
Client Vestforbrændingen I/S  
Built Vestforbrændingen I/S  
Year 2006

PlantWare has designed pipe system for a heat recovery system placed at Vestforbrændingen. The system derived the energy from cooling and condensating the flue gas.

### PlantWare scope was

#### General

- Site measurements
- Routing and arrangement

#### Piping on the following systems

- Distric heating
- Steam & condensate
- Water
- Utility systems

#### We had the following scope

- Design according to EN 13480
- Flexibility calculations
- Support desing
- Detailed design
- Fabrication isometrics

#### Steelwork

- Support steel for pipe supports
- Pipe bridge - 60 meters

#### We had the following scope

- Dimensioning
- Detailed design
- Fabrication drawings
