

Rambøll A/S - Cooling Installation for Danfoss A/S

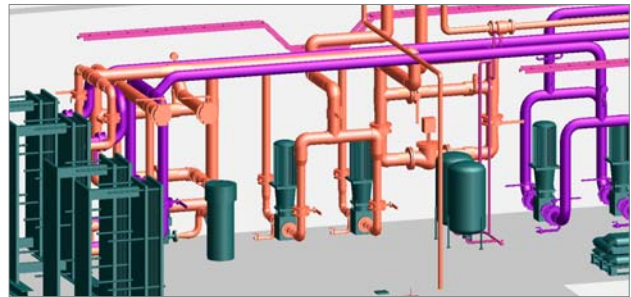

PlantWare made overall arrangement of cooling installation and detail mechanical engineering of pipework and steelwork for this cooling installation. The pipes was designed partly in stainless steel and partly in PE/uPVC pipes from WAVIN.

Documentation made for this project:

- GA - General Arrangement Drawings
- DA - Detail Arrangement Drawings
- Piping Isometric
- Isometric Pipe Drawing
- Steel Detailing
- Pipe Support

The cooling installation is being built in a cellar, so no modular design was applied.

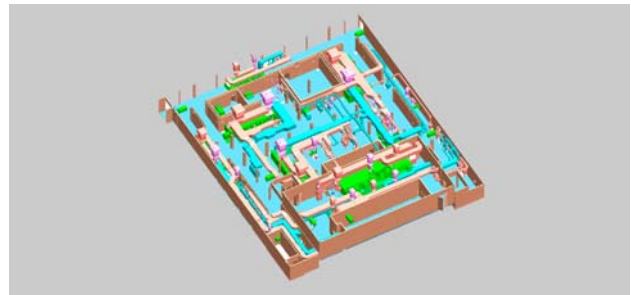

Pharmadule AB - HVAC Design for Vaccine Factory

Mechanical Design of HVAC for a Vaccine Manufacturing Facility in the USA:

- Duct Dimensioning
- Arrangement and detailed design of duct system

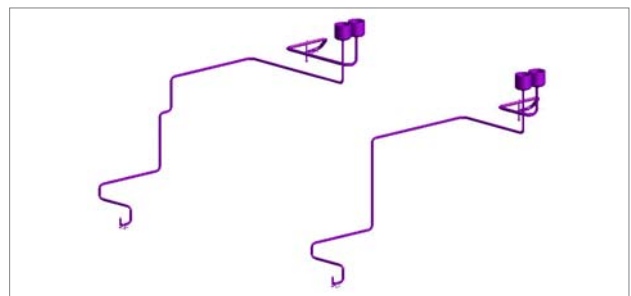

The mechanical design for the HVAC system was done in AVEVA PDMS.

Bioener Aps - Blow off pipes for Lakeside project

For a Takuma / Bioener Waste to Energy project in England PlantWare did engineering of blow off piping from Superheater and drum.

We made both pipeflexibility calculations via ROHR2 analyse tools as well as fabrication drawings through AVEVA PDMS. The engineering was done according to EN 13480.

NovoZymes A/S - Downstream processing

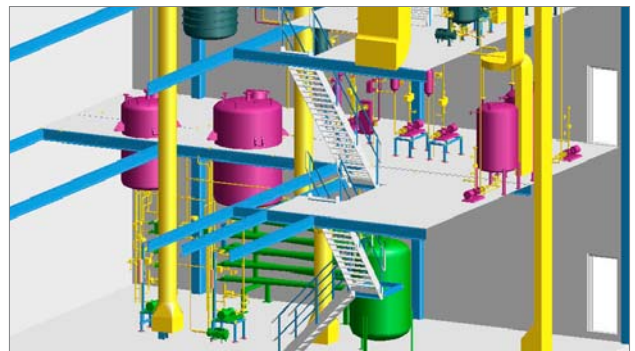

For NNE Pharmaplan PlantWare made detailed engineering of piping installations for a retrofit of a downstream enzymes plant at NovoZymes Kalundborg.

We made both raw water, purified water (RO-water) and process lines. The engineering covered on-site measurement to route piping and piping isometrics.

DANISCO A/S, Grindsted Soft'n'safe product line

PlantWare has for DANISCO made general arrangement of a new production facility for phthalates replacement. We made arrangement of pumps, heat exchangers, reactors etc. enabling manufacturing and construction of piping and structures based on detailed drawings.

Alfa Laval A/S ALDOX Beer Unit

PlantWare made mechanical design of ALDOX unit for Alfa Laval:

- General Arrangement
- Pipe Design for both bear and utility side
- Steel Frame
- Cable Routing Piping

We produced General Arrangement drawings, Detailed Arrangement drawings as well as Bill of Materials (BOM) for both steel work and pipe components.

DANIDA B2B Support

PlantWare A/S and Stella Shipping P/S has obtained DANIDA support after the B2B program for the initial creation of a marine engineering company in Bangladesh. The company's engineering platform will be AVEVA MARINE / TRIBON. 6 mechanical engineers / naval architects will begin training in Marstal in May.
